SPINEVISION-AI

AI-Assisted Spine Disease Detection Report

Report Generated: January 27, 2026 at 14:18
Requesting Physician: Zia ur Rahman

Overall Classification

Possibly Abnormal

Confidence: 47%

Detected Conditions

Condition	Probability	Severity
Disc Space Narrowing	47%	Low
Spondylolisthesis	16%	Very Low
Scoliosis	6%	Very Low
Vertebral Compression	4%	Very Low

Region of Interest Visualization

The highlighted regions indicate areas where the AI model detected potential abnormalities. Warmer colors (red/orange) indicate higher attention from the model.

Recommendations

1. Follow-up consultation with the treating physician is recommended.
2. Consider additional imaging if symptoms persist or worsen.
3. Monitor patient for any progression of symptoms.
4. Physical therapy evaluation may be beneficial.

Model Version: v0.1-dummy | **Analysis ID:** N/A

IMPORTANT DISCLAIMER: This report is generated by an AI-assisted diagnostic tool and is intended for clinical decision support only. It should not be used as the sole basis for diagnosis or treatment. All findings must be reviewed and confirmed by a qualified medical professional. The AI model's predictions are probabilistic in nature and may not capture all pathological conditions. Clinical correlation is mandatory.
